

Synchronous Motor with Lead Wire

Public selection information · 2026-09-09

Dishwashers and fans

Lead-wire connection simplifies appliance wiring, with multiple low-speed outputs and bidirectional rotation for valves, dampers and related mechanisms.

Rated voltage	220-240 V
Frequency	50/60 Hz
Output speed	2.5/3.0 · 4/4.8 · 5/6 rpm
Insulation class	Class E
Service life	≥100,000 cycles

For initial selection, not an approved production drawing. Confirm ratings, load, mounting, interfaces and certification scope for the exact model and program. Request model-specific torque data.
